# Understanding E-Consumers

- Consumer Behaviour Online
- Social Psychology of Social Shopping
- The Online Exchange Process
- Key Trends: Australian Insights and emerging economies
- The Cornerstones For Attracting Customers Online

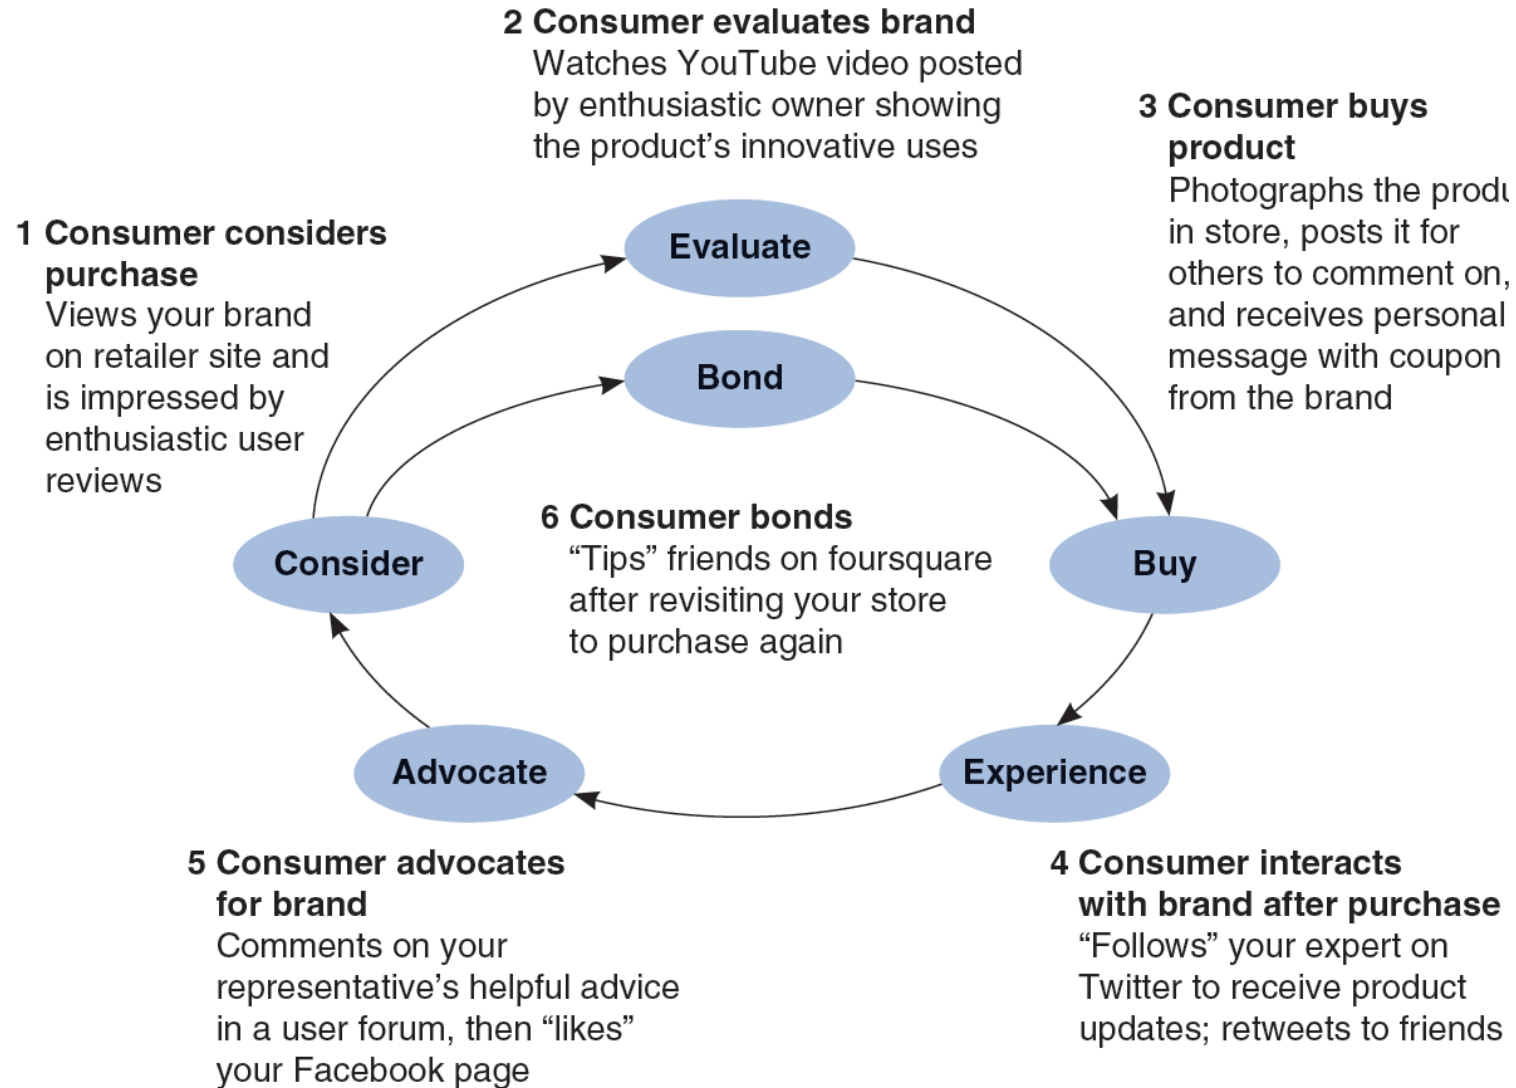

# Consumer Behavior Online

- Many consumer behavior principles that describe offline buyer behavior also apply to online behavior. Examples:
  - The buying process
  - Hierarchy of effects model
  - Marketers often use: AIDA model
- Word-of-mouth

# Consumer Behavior Online

- Consumer behavior theories for online buyer behavior (Exhibit 7.2, p192)
- Social Shopping (Networked shopping)
  - Social shopping harnesses the human capacity for *social learning*
  - Social shopping tools play to cognitive biases in how people are influenced by people when shopping

# The Social Consumer Decision Journey

# Social Psychology of Social Commerce

## Six Heuristics (mental rules of thumb) when we are out shopping

# Six Pillars of Social Commerce

- **Heuristic Number 1: Social Proof – follow the crowd**
  - During the [new customer journey](#) (aka the decision making cycle), a consumer may find themselves at a point of indecision. When consumers are uncertain of what to do next, social proof kicks in to see what others are doing or have done.

**SOCIAL PROOF**

~ The Rule ~  
WHEN UNCERTAIN, LOOK AT WHAT OTHERS ARE DOING

Fig. N°01

~ Psychological Reasoning ~  
WE LOOK AT WHAT OTHERS ARE DOING OR HAVE DONE TO RESOLVE PERSONAL INSECURITY WHEN MAKING A DECISION.

*Social Commerce Example*  
ASK FOR ADVICE FROM FRIENDS & FAMILY ABOUT THE DECISION.

Should I buy this coat?

I don't know, ask your Twitter followers.

**81%**  
OF CONSUMERS RECEIVE ADVICE

from friends & family relating to a product purchase through a social networking site

The infographic is divided into four quadrants. The top-left quadrant features a detailed illustration of a human eye with the caption 'Fig. N°01'. The top-right quadrant has a dark background with the title 'SOCIAL PROOF' in large, light-green letters, followed by the text '~ The Rule ~' and 'WHEN UNCERTAIN, LOOK AT WHAT OTHERS ARE DOING'. The middle-left quadrant contains the text '~ Psychological Reasoning ~' and 'WE LOOK AT WHAT OTHERS ARE DOING OR HAVE DONE TO RESOLVE PERSONAL INSECURITY WHEN MAKING A DECISION.' The middle-right quadrant shows a small illustration of a bookshelf. The bottom-left quadrant has a dark background with the text 'Social Commerce Example' and 'ASK FOR ADVICE FROM FRIENDS & FAMILY ABOUT THE DECISION.' The bottom-right quadrant features an illustration of a man, a woman, and a child in a coat shop. A speech bubble from the man asks 'Should I buy this coat?' and another from the woman says 'I don't know, ask your Twitter followers.' To the right, a large '81%' is displayed above the text 'OF CONSUMERS RECEIVE ADVICE' and 'from friends & family relating to a product purchase through a social networking site'.

**AUGUST 11, 1994**

**NETMARKET.COM**

**FIRST-EVER INTERNET PURCHASE**

**11.50 AM JULY 8, 2009**

**1-800-FLOWERS.COM**

**FIRST PURCHASE WITHIN FACEBOOK**

# Six Pillars of Social Commerce

- **Heuristic Number 2: Authority – the guiding light**
- Authority in social media is not only related to commerce, but it is the very source of how [interest graphs](#) take shape. During the dynamic customer journey, authorities rise as the sherpas to guide in effective decision making.
- In Edelman's recent [Trust Barometer](#) report, academics and experts topped the list for trust and credibility (66%), followed by a technical expert at a company (66%).

**AUTHORITY**

~ The Rule ~  
AUTHORITY RULES

~ Psychological Reasoning ~  
SPECIALISTS' FINDINGS ARE HIGHLY REGARDED  
DUE TO THEIR EXPERTISE & AUTHORITY.

**77%**  
OF ONLINE SHOPPERS  
USE REVIEWS  
to make a purchase  
decision

*Social  
Commerce  
Example*

RESEARCH ONLINE  
PRODUCT REVIEWS  
ON BLOGS, YOUTUBE,  
TWITTER OR  
FACEBOOK.

# Six Pillars of Social Commerce

- **Heuristic Number 3: Scarcity- less is more**
  - A function of supply and demand, greater value is assigned to the resources that are, or perceived to be, less available. Driven by the fear of loss or the stature of self-expression, consumers are driven by the ability to participate as members in exclusive deals.

**SCARCITY**

~ The Rule ~  
**LESS IS MORE**

Fig. N°03

~ Psychological Reasoning ~  
**WE INSTINCTIVELY ASSIGN GREATER VALUE TO RESOURCES AS THEY BECOME LESS AVAILABLE DUE TO FEAR OF POTENTIAL LOSS.**

*Social Commerce Example*  
~  
**BECOME A MEMBER TO RECEIVE EXCLUSIVE DEALS.**

Exclusive Facebook  
**SALE**  
LIMITED TIME ONLY!

**77%**  
OF PEOPLE LIKE GETTING EXCLUSIVE OFFERS  
~  
that they can redeem via Facebook

# Six Pillars of Social Commerce

- **Heuristic Number 4: Liking – builds bonds and trust**

- There's an old saying in business, people do business with people they like. And, nothing is truer than that statement in social media. Revisiting the Edelman Trust Barometer, the third most trusted person is someone like yourself/peers (65%). We have a natural inclination to emulate those we like, admire, find attractive as these attributes also contribute to the “guilt by association” impression of self-identity.

**LIKE**

~ The Rule ~  
FOLLOW THOSE YOU LIKE

~ Psychological Reasoning ~  
WE EMULATE & AGREE WITH PEOPLE WE LIKE,  
ADMIRE & FIND ATTRACTIVE BECAUSE IT HELPS  
BUILD SOCIAL BONDS & TRUST.

~ Almost ~  
**50%**  
OF SHOPPERS  
HAVE MADE  
A PURCHASE

~ based on a  
recommendation  
through a social  
media network

*Social  
Commerce  
Example*

SPREAD DEALS,  
TRENDS &  
REVIEWS FROM  
THOSE YOU TRUST  
TO YOUR OWN  
NETWORK.

# Six Pillars of Social Commerce

- **Heuristic Number 5: Consistency**
  - When faced with uncertainty, consumers tend not to take risks. Rather, they prefer to stay consistent with beliefs or past behavior. When these do not line up in the decision making cycle, consumers tend to feel cognitive dissonance or true psychological discomfort.

**CONSISTENCY**

~ The Rule ~  
**STAY CONSISTENT**

~ Psychological Reasoning ~  
**WHEN FACED WITH UNCERTAINTY, WE PREFER OPTIONS THAT ARE CONSISTENT WITH OUR BELIEFS & PAST BEHAVIOR.**

*Social Commerce Example*  
**PURCHASES MADE FROM BRANDS YOU TRUST REINFORCE YOUR FUTURE SHOPPING PATTERNS.**

**Trusted Brand | \$150**  
*Buy Now!*

**Unknown Brand | \$70**  
*Buy Now!*

**62%** OF ONLINE SHOPPERS ARE BRAND LOYAL  
due to online satisfaction

# Six Pillars of Social Commerce

- **Heuristic Number 6: Reciprocity – pay it forward**
  - Perhaps the greatest asset in social capital is that of [benevolence](#). It's easy to get caught up in a cycle of paying it backward, where we expect to be paid or rewarded for our goods, services, or actions.

**RECIPROcity**

~ The Rule ~  
**PAY IT FORWARD**

Fig. N°06

~ Psychological Reasoning ~  
**WE HAVE AN INNATE DESIRE TO REPAY FAVORS IN ORDER TO MAINTAIN SOCIAL FAIRNESS WHETHER THOSE FAVORS WERE INVITED OR NOT.**

Did you hear about the sale on Facebook?

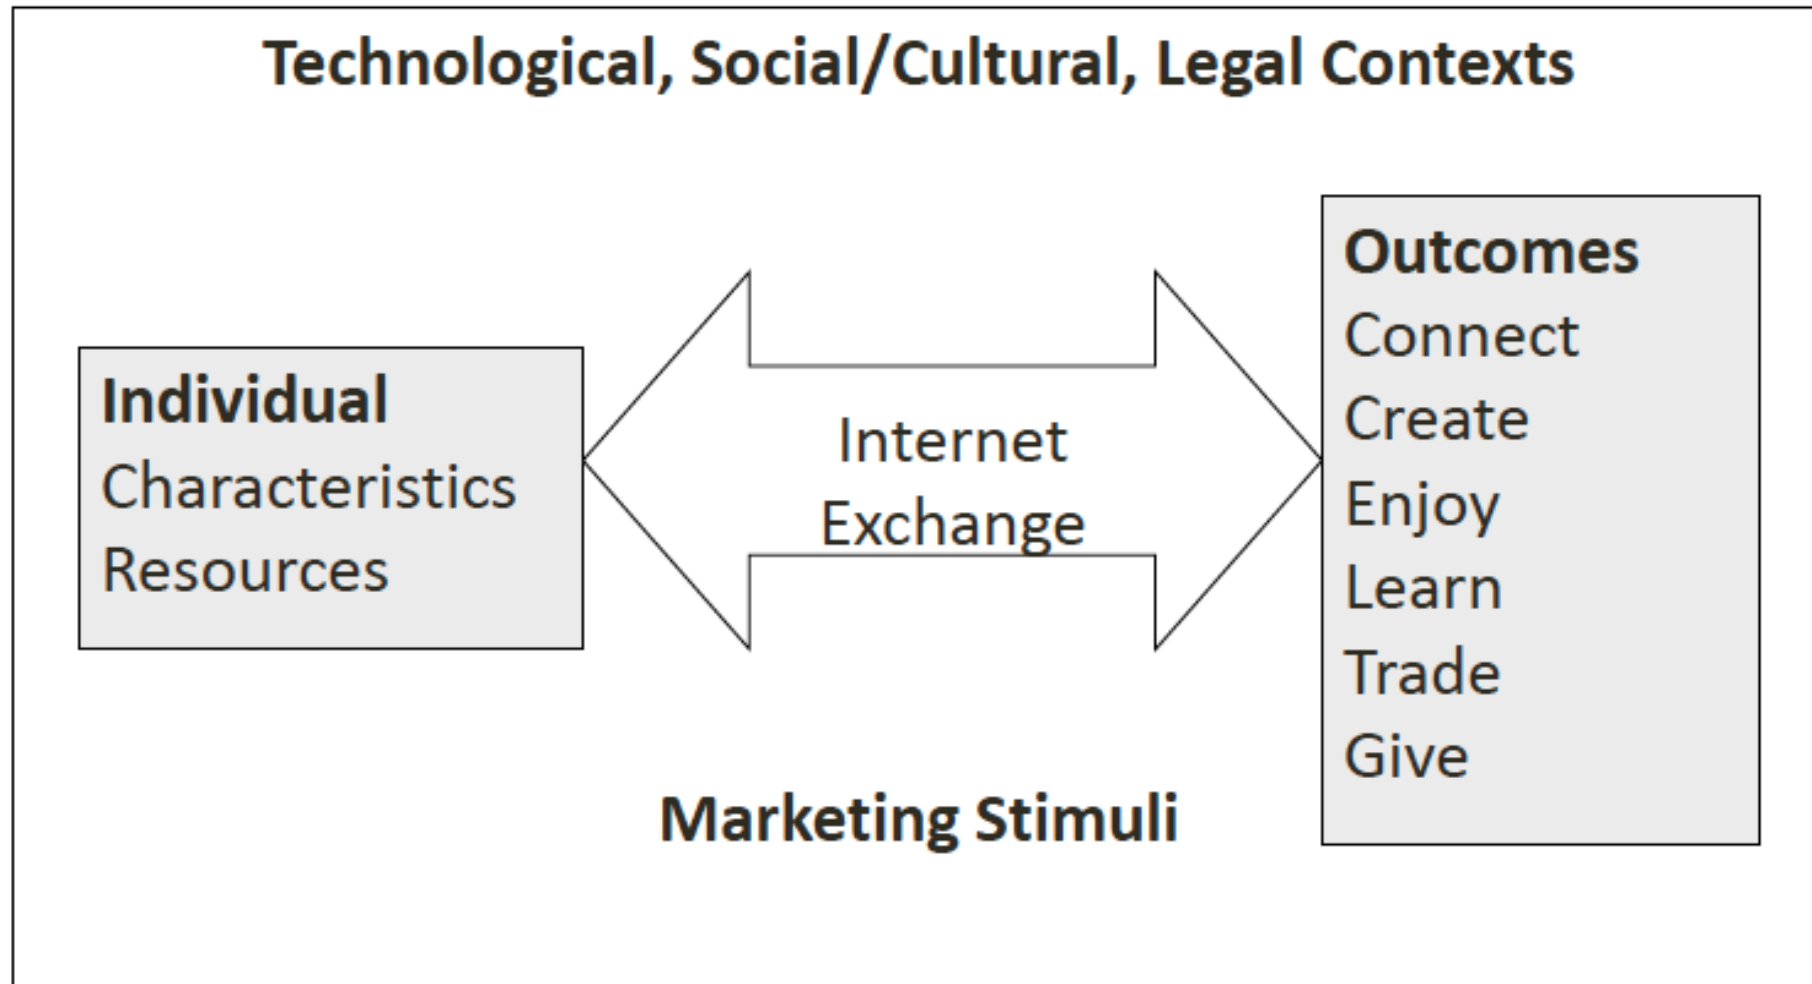

No, thanks for the tip!

Every month, over  
**25,000,000,000**  
PIECES OF CONTENT ARE SHARED ON FACEBOOK

Social Commerce Example  
~  
**SHARE UPDATES AND EXCLUSIVE DEALS YOU HAVE RECEIVED WITH YOUR NETWORK.**

The infographic is divided into several sections. At the top left, there is an illustration of two hands shaking, labeled 'Fig. N°06'. To the right of this is a dark box with the word 'RECIPROcity' in large, light blue letters. Below this is a light-colored box with the text '~ The Rule ~ PAY IT FORWARD'. The middle section features an illustration of a shelf with various items, followed by the text '~ Psychological Reasoning ~ WE HAVE AN INNATE DESIRE TO REPAY FAVORS IN ORDER TO MAINTAIN SOCIAL FAIRNESS WHETHER THOSE FAVORS WERE INVITED OR NOT.'. The bottom section shows two men in a conversation. One man asks, 'Did you hear about the sale on Facebook?' and the other replies, 'No, thanks for the tip!'. Below them, it states 'Every month, over 25,000,000,000 PIECES OF CONTENT ARE SHARED ON FACEBOOK'. On the far right, a dark box contains the text 'Social Commerce Example ~ SHARE UPDATES AND EXCLUSIVE DEALS YOU HAVE RECEIVED WITH YOUR NETWORK.' with decorative flourishes above and below.

# The Online Exchange Process

- Individual characteristics include demography, attitude towards technology, online skill and experience and goal orientation

**More than a quarter of Americans have chosen to not post something online after seeing harassment of others**

*% of U.S. adults who have \_\_\_\_\_ after witnessing harassing behaviors directed toward others online*

Note: Total may not add to 100% because respondents could select multiple options.  
 Source: Survey conducted Jan. 9-23, 2017  
 "Online Harassment 2017"

PEW RESEARCH CENTER

**Most seniors say they need help using new electronic devices**

*% of U.S. adults who say the statement, 'When I get a new electronic device, I usually need someone else to set it up or show me how to use it,' describes them very or somewhat well, by age*

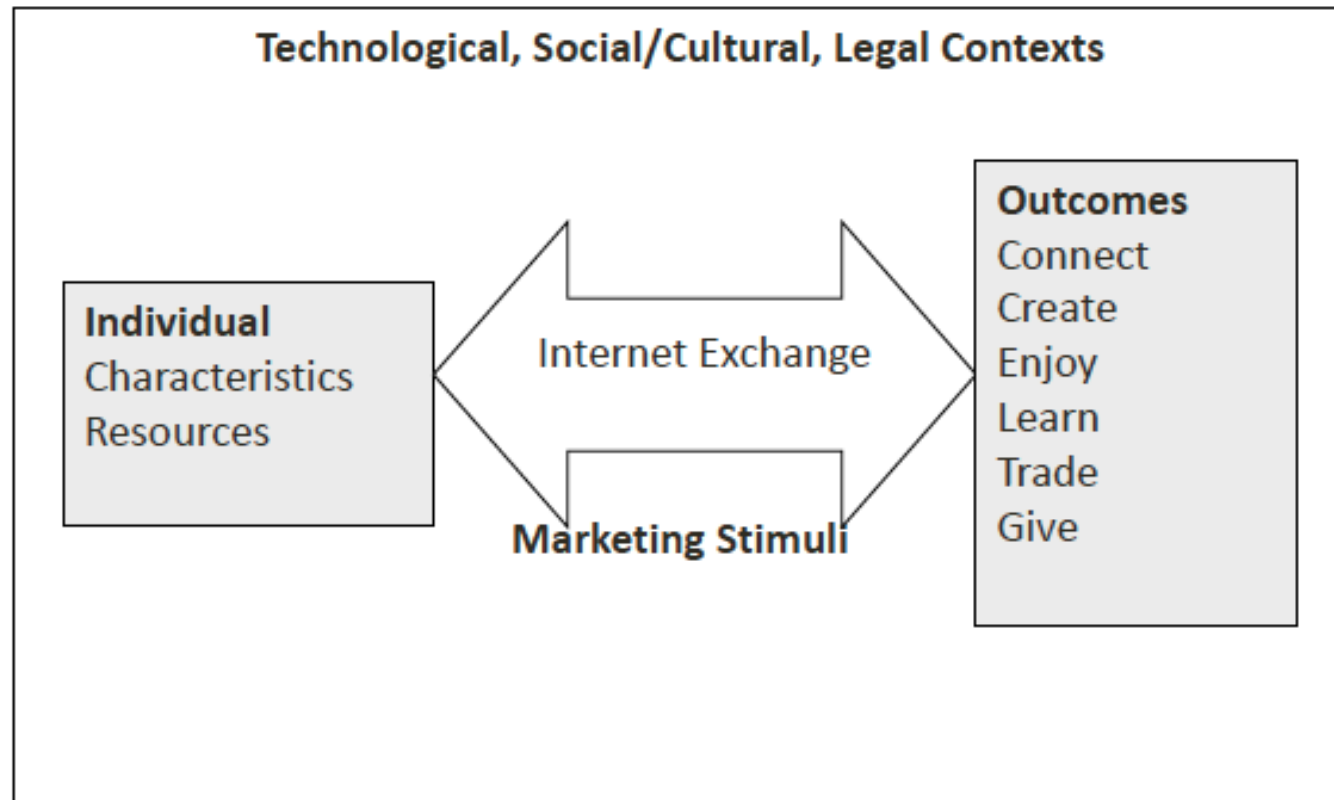

Note: NET category calculated prior to rounding.  
 Source: Survey conducted Oct. 13- Nov. 15, 2015.

# Exchange Outcomes

There are 6 basic things that people do online:

# Exchange Outcomes

Connect, Create, Enjoy

# Exchange Outcomes

<http://www.google.com/trends/topcharts#date=2013>

Learn, Trade and Give

# Media Multitasking

The rapid development and evolution of entertainment and technology enables the users/consumers to use mobile devices whenever they want. The term “Media Multitasking” comes in view when someone is using 2 or more type of media content simultaneously

# Media multitasking

## TV Multitasking Behavior, by Generation

(% of US respondents aged 14+, summary of always/almost always done while watching home TV)

March 2016

	2012-2015 Trend	2015	Millennials			Gen X	Baby Boomers	Matures
			14-18	19-25	26-32	33-49	50-68	69+
Browse and surf the web		33%	42%	50%	52%	33%	23%	8%
Use a social network		29%	45%	47%	48%	27%	16%	4%
Read email		29%	31%	39%	44%	28%	24%	14%
Text message		26%	45%	46%	43%	24%	12%	6%
Browse for products/services online		23%	26%	37%	41%	24%	14%	3%
Play video games		19%	30%	33%	33%	19%	9%	4%
Nothing else - just watch TV		8%	3%	4%	5%	6%	12%	13%

# Result

Based on a review of 49 studies, the present meta-analysis showed that multitasking had negative effects on cognitive outcomes but had positive effects on attitudinal outcomes. In addition, this meta-analysis showed that user control, task relevance, task contiguity, and age were significant moderators of multitasking effects on cognitive outcomes
